

AKS Lytham

Hello,

At AKS we provide a school bus service, with an excellent track record of reliability and safety, to take the stress out of transporting students to and from school. Sustainability is also key, as the use of the buses potentially reduces the need for as many parent vehicles being used.

We prioritise student safety and safeguarding by having experienced, DBS checked drivers. All buses are fitted with seatbelts which we ask students to wear. Via the Vectare software we have real-time tracking of the buses and the potential to send alerts if there are delays. The software also tracks when the student has boarded the bus.

For more information about the routes, stops and pricing, please look at the [Transport Guide](#), which details all the Home to School Bus Service options that are available to students currently. One of the key benefits of Vectare is the ability to view seat availability in real time. There will be no concern about whether there will be a seat for your child on their preferred route. This real-time visibility ensures that you can plan your child's transportation more efficiently and avoids any last-minute issues.

If you do have any feedback on the service or would like to request a new stop, please do not hesitate to contact me. Feedback is helpful for making potential service improvements, and whilst it will not be possible to accommodate all parental requests and wishes, I do endeavour to deliver the best service.

Yours sincerely,
Deb Aldred
