NEWSLETTER

This newsletter is a collation of all the opportunities we have heard about from employers and universities. Please use the links included to read more information and apply to anything you are interested in. Links are underlined.

Opportunities

Do you have an interest in Engineering? Do you like challenges and problem solving? Log on to this webinar on the 4th February to discover more about the fields of Chemical, Mechanical, Aerospace, and Automotive and Motorsport Engineering, and the extensive career pathways that these exciting subjects can lead you to!

How To Plan Your Career Effectively, In Partnership with Pathway CTM: February 13th, 14:00. Are you looking to set clear career goals, understand your strengths, and make confident decisions about your future? Career planning is an essential lifelong skill, and this workshop will guide you through practical strategies to help you map out your pathway. Register here.

In this Study Skills session on the 3rd February, 12:45 - 13:30, Dr Maria Serban, Lecturer in the School of Politics, Philosophy and Area Studies at University of East Anglia, will lead an interactive skills and insight workshop and workout on Critical Thinking Skills.

Degree Apprenticeships are an increasingly popular choice to the traditional university route. Join the University of Exeter to find out what the benefits are and how to apply. 2nd February, 18:00 - 19:00, register here.

Check out this case study about Isabel Chadwick - Project Planning & Controls Apprentice at Thales. Isabel tells us about her role, how she got there and how she has completed many hours of volunteering through her workplace.

This Rolls-Royce virtual experience gives you a behind-the-scenes look at the Project Manager role and the critical responsibilities it entails across our diverse projects. Start the Sprint with Springpod.

Meet the Early Careers team at Dunelm to learn about their exciting apprenticeship opportunities. In this recording you'll find out about Dunelm's early careers programmes and pick up some hints and tips for your apprenticeship application.

These Masterclasses for Year 12s will introduce you to subjects available at UCL. The hour-long sessions run Tuesday + Thursday, 16:00 - 17:00 and will feature a lecture on a specific topic from UCL academics and PhD students.

Career of the Week

Civil Engineer

As a civil engineer, you'll oversee the actual construction on the ground and work in conjunction with consulting engineers. All civil engineers need a good understanding of design and construction processes, as well as of health and safety issues. You'll organise human and material resources on-site and ensure that projects run to time and budget and are safe to work on.

Labour Market Fact

"The proportion of full-time undergraduates undertaking paid work working during term time is now at 68%. This is up from 56% in 2024 and just 42% in 2020."

This tells us that the increasing cost of living is impacting university students too.

Check out [this application deadline list](#) for 2026 internships, including summer work experience placements.

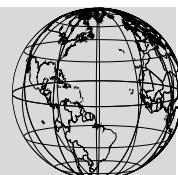

World Spotlight

Country: Poland

Key Links: [Study in Poland](#) | [Visa Information](#)

Key Information:

- There are over 500 higher education institutions (HEIs) in Poland, both public and private. The Polish academic year runs from October to early February (fall semester), and from mid-February to June (summer semester), each term ending with exams.
- Bachelors degrees in Poland, or first-cycle studies, are typically three to four years in length and are offered as either a Bachelor of Arts (Licencjat) or Bachelor of Science or Engineering (Inżynier).
- Course fee averages are 8,500 ZL (£1,700) per year for the first, second and long cycle studies and 12,700 ZL (£2,500) per year for postgraduate as well as scientific, arts, specialist and post-doctoral internships.
- There's no central applications system for higher education in Poland, meaning you'll submit your applications directly to your chosen institutions.

Employer Spotlight

"Rolls-Royce is one of the most enduring and iconic brands and has been at the forefront of innovation for over a century. Designing, building and servicing systems that provide critical power to customers, where safety and reliability are paramount. We are a force for progress; powering, protecting and connecting people everywhere."

Find out more [here](#).

Uni Spotlight

"The University of Manchester is a centre of teaching excellence, world-class research, outstanding student experience, and social responsibility. Part of the prestigious Russell Group of universities, it's institutions like ours that have the greatest responsibility to act as the world faces big challenges. Together, we face this head on."
